

May – June 2018

Air Monitoring - 2018 Secure Landfill Construction and Operation

Program includes particulate monitoring using real-time meters for particulates (or dust) and volatile organic compounds (VOCs) and sampling for PCB analytical testing. Corrective action levels have been established based on levels that are safe for the community for particulates, VOCs, and PCBs. The actual monitoring results are compared to the corrective action levels to determine if adjustments in construction are needed. The air monitoring locations and tabulated results are provided below.

2018 Air Particulate Data

(Corrective Action Level = 0.150 milligram per cubic meter above upwind location)

		Monitoring Station ID (see figure)

July 2018

Air Monitoring - 2018 Secure Landfill Construction and Operation

Program includes particulate monitoring using real-time meters for particulates (or dust) and volatile organic compounds (VOCs) and sampling for PCB analytical testing. Corrective action levels have been established based on levels that are safe for the community for particulates, VOCs, and PCBs. The actual monitoring results are compared to the corrective action levels to determine if adjustments in construction are needed. The air monitoring locations and tabulated results are provided below.

Total PCBs (micrograms per cubic meter)

Air Monitoring - 2018 Route 131 Staging Area Construction

Program includes particulate monitoring using real-time meters for particulates (or dust) and volatile organic compounds (VOCs) and sampling for PCB analytical testing. Corrective action levels have been established based on levels that are safe for the community for particulates, VOCs, and PCBs. The actual monitoring results are compared to the corrective action levels to determine if adjustments in construction are needed. The air monitoring locations and tabulated results are provided below.

2018 Air Particulate Data

Corrective Action Level = 0.150 milligram per cubic meter above upwind location

Total PCBs (micrograms per cubic meter)

Air Monitoring - 2018 Route 131 Staging Area Construction

Program includes particulate monitoring using real-time meters for particulates (or dust) and volatile organic compounds (VOCs) and sampling for PCB analytical testing. Corrective action levels have been established based on levels that are safe for the community for particulates, VOCs, and PCBs. The actual monitoring results are compared to the corrective action levels to determine if adjustments in construction are needed. The air monitoring locations and tabulated results are provided below.

Total PCBs (micrograms per cubic meter)

Air Monitoring - 2018 Route 131 Staging Area Construction

Program includes particulate monitoring using real-time meters for particulates (or dust) and volatile organic compounds (VOCs) and sampling for PCB analytical testing. Corrective action levels have been established based on levels that are safe for the community for particulates, VOCs, and PCBs. The actual monitoring results are compared to the corrective action levels to determine if adjustments in construction are needed. The air monitoring locations and tabulated results are provided below.

November 2018

Air Monitoring - 2018 Secure Landfill Construction and Operation

Program includes particulate monitoring using real-time meters for particulates (or dust) and volatile organic compounds (VOCs) and sampling for PCB analytical testing. Corrective action levels have been established based on levels that are safe for the community for particulates, VOCs, and PCBs. The actual monitoring results are compared to the corrective action levels to determine if adjustments in construction are needed. The air monitoring locations and tabulated results are provided below.

Total PCBs (micrograms per cubic meter)

Air Monitoring - 2018 Route 131 Staging Area Construction

Program includes particulate monitoring using real-time meters for particulates (or dust) and volatile organic compounds (VOCs) and sampling for PCB analytical testing. Corrective action levels have been established based on levels that are safe for the community for particulates, VOCs, and PCBs. The actual monitoring results are compared to the corrective action levels to determine if adjustments in construction are needed. The air monitoring locations and tabulated results are provided below.

2018 Air Particulate Data

(Corrective Action Level = 0.150 milligram per cubic meter above upwind location)

		Monitoring Station ID (see figure)				
Date	Action Level Check	SA-AIR1	SA-AIR2	SA-AIR3	SA-AIR4	Notes
Monitoring activities not conducted at this location in November 2018.						

NA = Data not collected or recorded

Particulates (milligrams per cubic meter)

2018 Air Volatile Organic Compound Data

(Corrective Action Level = 25 ppm above upwind location)

		Monitoring Station ID (see figure)				
Date	Action Level Check	SA-AIR1	SA-AIR2	SA-AIR3	SA-AIR4	Notes
Monitoring activities not conducted at this location in November 2018.						

NA = Data not collected or recorded

Volatile Organic Compounds (VOCs parts per million)

2018 Air PCB Data

(Corrective Action Level = 0.100 microgram per cubic meter)

		Monitoring Station ID (see figure)				
Date	Action Level Check	SA-AIR1	SA-AIR2	SA-AIR3	SA-AIR4	Notes
Monitoring activities not conducted at this location in November 2018.						

NA = Data not collected or recorded

Total PCBs (micrograms per cubic meter)

Water Monitoring - 2018 Route 131 Staging Area Construction

Program includes turbidity monitoring using real-time meters for solids and PCB analytical testing at water column and water intake locations. Corrective action levels have been established based on levels that are safe for the community for both turbidity and PCBs. The actual monitoring results will be compared to the corrective action levels to determine if adjustments in construction are needed. The water locations and tabulated results are provided below.

2018 Water Column Turbidity Data (Corrective Action Level = 25 NTU above WC-UP Level)

Turbidity (nephelometric turbidity unit; NTU)

2018 Water Column PCB Data (Corrective Action Level = 0.5 microgram per liter)

		Monitoring Station ID (see figure)			
Date	Action Level Check	WC-NF	WC-MOUTH	WC-SLR	Notes
Monitoring activities not conducted at this location in November 2018.					

Total PCBs (micrograms per liter)

Water Intake Monitoring Locations

2018 Water Intake Turbidity Data (Corrective Action Level = 25 NTU above Baseline Level)

		Monitoring Station ID (see figure)			
Date	Action Level Check	IN-AE-RAW	IN-SRMT-RAW	IN-SRMT-FIL	Notes
Monitoring activities not conducted at this location in November 2018.					

NA = Data not collected or recorded
Turbidity (nephelometric turbidity unit; NTU)

2018 Water Intake PCB Data (Corrective Action Level = 0.5 microgram per liter)

		Monitoring Station ID (see figure)			
Date	Action Level Check	IN-AE-RAW	IN-SRMT-RAW	IN-SRMT-FIL	Notes
Monitoring activities not conducted at this location in November 2018.					

Total PCBs (micrograms per liter)

Air Monitoring - 2018 Soil Removal Areas Along the North Shore

Program includes particulate monitoring using real-time meters for particulates (or dust) and volatile organic compounds (VOCs) and sampling for PCB analytical testing. Corrective action levels have been established based on levels that are safe for the community for particulates, VOCs, and PCBs. The actual monitoring results are compared to the corrective action levels to determine if adjustments in construction are needed. The air monitoring locations and tabulated results are provided below.

Total PCBs (micrograms per cubic meter)

Air Monitoring - 2018 In-river Capping Test

Program includes particulate monitoring using real-time meters for particulates (or dust) as all material being handled is clean. Corrective action levels have been established based on levels that are safe for the community. The actual monitoring results are compared to the corrective action levels to determine if adjustments in construction are needed. The air monitoring locations and tabulated results are provided below.

2018 Air Particulate Data

Water Monitoring - 2018 In-river Capping Test

Program includes turbidity monitoring using real-time meters for solids and PCB analytical testing at water column and water intake locations. Corrective action levels have been established based on levels that are safe for the community for both turbidity and PCBs. The actual monitoring results will be compared to the corrective action levels to determine if adjustments in construction are needed. The water locations and tabulated results are provided below.

Total PCBs (micrograms per cubic meter)

Air Monitoring - 2018 In-river Capping Test

Program includes particulate monitoring using real-time meters for particulates (or dust) as all material being handled is clean. Corrective action levels have been established based on levels that are safe for the community. The actual monitoring results are compared to the corrective action levels to determine if adjustments in construction are needed. The air monitoring locations and tabulated results are provided below.

Air Monitoring Locations

2018 Air Particulate Data

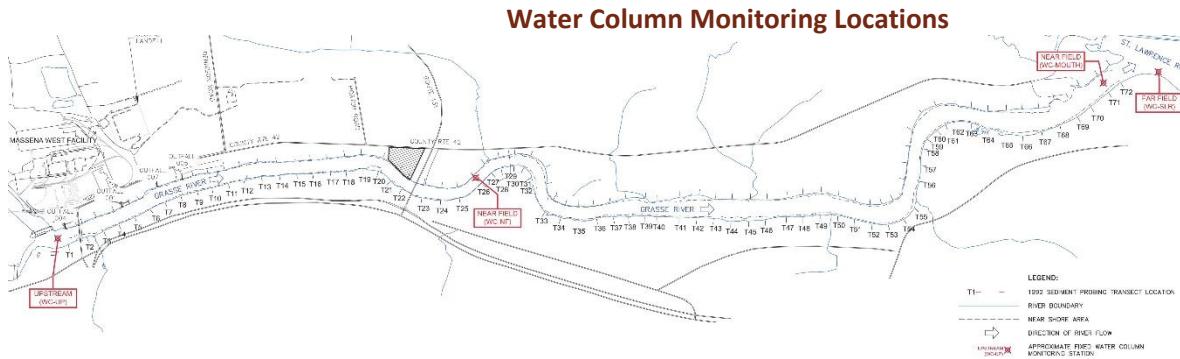

(Corrective Action Level = 0.150 milligrams per cubic meter above upwind location)

		Monitoring Station ID (see figure)				
Date	Action Level Check	EP-AIR1	EP-AIR2	EP-AIR3	EP-AIR4	Notes
Dec 1	All Below	0.0161	0.03152	0.015	0.0159	--

NA = Data not collected or recorded
Particulates (milligrams per cubic meter)

Water Monitoring - 2018 In-river Capping Test

Program includes turbidity monitoring using real-time meters for solids and PCB analytical testing at water column and water intake locations. Corrective action levels have been established based on levels that are safe for the community for both turbidity and PCBs. The actual monitoring results will be compared to the corrective action levels to determine if adjustments in construction are needed. The water locations and tabulated results are provided below.

2018 Water Column Turbidity Data

Corrective Action Level = 25 NTU above WC-UP Level

Turbidity (nephelometric turbidity unit; NTU)

2018 Water Column PCB Data

Corrective Action Level = 0.5 microgram per liter

		Monitoring Station ID (see figure)			
Date	Action Level Check	WC-NF	WC-MOUTH	WC-SLR	Notes
Monitoring activities not conducted at this location in December 2018.					

Total PCBs (micrograms per liter)

Water Intake Monitoring Locations

2018 Water Intake Turbidity Data

(Corrective Action Level = 25 NTU above Baseline Level)

		Monitoring Station ID (see figure)			
Date	Action Level Check	IN-AE-RAW	IN-SRMT-RAW	IN-SRMT-FIL	Notes
Monitoring activities not conducted at this location in December 2018.					

NA = Data not collected or recorded

Turbidity (nephelometric turbidity unit; NTU)

2018 Water Intake PCB Data
(Corrective Action Level = 0.5 micrograms per liter)

		Monitoring Station ID (see figure)			
Date	Action Level Check	IN-AE-RAW	IN-SRMT-RAW	IN-SRMT-FIL	Notes
Monitoring activities not conducted at this location in December 2018.					

Total PCBs (micrograms per liter)
